HAMADRYADE FOUNDATION

PROTECTING AND RESTORING THE AMAZON

At Hamadryade Foundation, we are committed to preserving and restoring the Amazon rainforest through concrete actions in four key areas of development. As a visitor to Hamadryade Lodge or Hamadryade Tours, you too can be part of this positive impact.

Soil Regeneration

We restore degraded soils affected by deforestation and pollution, bringing back their fertility through natural techniques that revitalize biodiversity and ensure a sustainable future.

Reforestation of Devastated Areas

We bring life back to areas scarred by mining and deforestation, restoring ecosystems with native species to maintain environmental balance, protect local flora and fauna, and capture carbon.

Environmental Education & Awareness

We believe that protecting the planet starts with knowledge. Our educational programs for communities, schools, and visitors help create a network of rainforest guardians committed to conservation.

Meliponiculture Development

We promote the breeding and conservation of stingless bees, essential for the pollination of Amazonian forests. This ancestral practice not only protects biodiversity but also empowers local communities by providing sustainable alternatives for production.

Every action counts. Every tree planted, every beehive protected, and every person educated brings us closer to a future where the Amazon remains alive.

Want to learn more about Hamadryade Foundation or contribute to our projects? Ask at Hamadryade Lodge or Hamadryade Tours.
